

Lantana

This rugged species is the backbone of our summer flower program. Variety selection is critical, however, as not all are created equal. 'New Gold' is undoubtedly the hardiest and most drought tolerant. 'Patriot Rainbow' is a true dwarf cultivar that seldom grows taller than 12 inches. 'Patriot Popcorn' is the first dwarf yellow-flowered variety that has performed well for us. Its flowers aren't the brilliant yellow of 'New Gold' but the plants stay at a much more manageable height.
